

SMART PANEL 3

Smart Panel 3 is the perfect replacement for your car commands. It has one button, one switch and one rotary.

Each button/switch/rotary status are sent over the CAN line to the vehicle.

Each button/switch/rotary can be customized in lighting color. Only rotary *sectors* have fixed blue color.

The light intensity can be regulated and all the functions can be configured to change color on a status change or a particular condition monitored over CAN-bus line (eg. Fuel pump goes in fault and the appropriate switch change color moves from green to red)
